Our A.S. in Ultrasound Technology program prepares our students for entry-level employment after their graduation as a Diagnostic Medical Sonographer with specialization in general sonography (Abdominal and Small Parts, Obstetrics and Gynecology and Vascular Sonography). Graduates will be qualified to work in hospitals, imaging centers, physicians’ offices, or clinics. Our graduates will receive the necessary knowledge and skills to transition from education to employment.

- Institutionally Accredited by the Accrediting Bureau for Health Education Schools.
- Programmatically Recognized by American Registry of Radiologic Technologists.
- Approved to operate by the California Bureau for Private Postsecondary Education.

*Approval to operate means compliance with state standards as set forth in the Ed. Code.

A.S. in UT Program Highlights:

- 2-year intensive program including internship
- Associate of Science Degree
- Experienced Instructors
- Our imaging lab is equipped with modern ultrasound scanners.
- Financial Aid Assistance for those who qualify
- Private Loans Assistance
- Employment Assistance

Contact our admissions department to find out if you qualify for this program.

1-877-GURNICK (487-6425)
www.gurnick.edu
Our A.S. in Ultrasound Technology Program includes didactic and laboratory training as well as a clinical internship component that correlates with the theoretical knowledge. Upon successful completion of the program, students will be prepared to sit for the ARRT (S) and ARDMS exams and work as Ultrasonographers.

Our Program Curriculum provides students with the technical, clinical, and interpersonal skills necessary to succeed in this field; covers topics such as ultrasound physics and instrumentation, abdominal and small parts, obstetrics and gynecology, vascular ultrasound and patient care.

Our Campuses conduct courses in classrooms equipped with modern audio-visual teaching aids, anatomical charts and models. Our patient-care lab is equipped with hospital beds, anatomical models, hi-fidelity interactive simulation mannequins and other patient-care equipment. The scan laboratory is equipped with ultrasound machines (3D and color-flow imaging) and a MedSim Ultrasound Training Simulator.

Our Clinical Education (Internship) is a crucial part of the UT Program that facilitates the development of student competence with clinical skills. Clinical education allows students to apply the lecture topics to practical use. Internship will be provided for all of our students.

Our Ultrasound Technology Program is currently offered at San Mateo, Sacramento and Fresno Campuses:
