The A.O.S. in Cardiac Ultrasound Technology Program includes didactic coursework, lab training, and a clinical component correlating with theoretical knowledge.

Our Ultrasound Scan Laboratory has multiple ultrasound machines allowing students to practice scanning one another.

Students will receive six (6) months of clinical rotations in various settings, including imaging centers and hospitals. The students have the opportunity to develop and strengthen cardiac scanning skills during their externships.

The student will receive an Associate in Occupational Science degree at the end of the program. Students will also be prepared and eligible to sit for their Cardiac boards.
