Table 1. Program Offerings per Campus

Program Types and Names	Campus Location
Degree Programs	
Associate of Occupational Science in Cardiac Ultrasound Technology (A.O.S. in CUT)	Fresno, Sacramento, San Jose
Associate of Occupational Science in Respiratory Therapy (A.O.S. in RC)	Modesto
Associate of Occupational Science in Radiologic Technology (A.O.S. in RT)	Van Nuys
Associate of Occupational Science in Ultrasound Technology (A.O.S. in UT)	Fresno, Sacramento, San Jose
Associate of Occupational Science in Vascular Ultrasound Technology (A.O.S. in VUT)	San Jose
Associate of Science in Magnetic Resonance Imaging (A.S. in MRI)	Modesto, Sacramento, San Jose
Associate of Science in Nuclear Medicine Technology (A.S. in NM)	Concord (via Distance Education)
Associate of Science in Nursing (ADN)	Fresno
Associate of Science in Nursing (LVN to ADN)	Fresno
Associate of Science in Occupational Therapy Assistant (A.S. in OTA)	San Jose
Associate of Science in Physical Therapist Assistant (A.S. in PTA)	San Jose, Fresno
Associate of Science in Radiologic Technology (A.S. in RT)	Concord, Sacramento
Associate of Science in Vocational Nursing (A.S. in VN)	Fresno
Bachelor of Science in Nursing (BSN)	Concord
Bachelor of Science in Nursing (LVN to BSN)	Concord
Bachelor of Science in Nursing (RN to BSN)	Concord (via Distance Education)
Bachelor of Science in Radiation Therapy (B.S. in RT)	Van Nuys (via Distance Education)

Bachelor of Science in Radiologic Sciences (B.S. in RS)	Concord (via Distance Education)
Master of Science in Nursing (BSN to MSN)	Concord (via Distance Education)
Diploma Programs	
X-ray Technician with Medical Assistant Skills (XTMAS)	Concord, Sacramento, Van Nuys
Vocational Nurse (VN)	Concord, Fresno, Modesto, Sacramento, San Jose
Certificate Programs	
Bone Densitometry Technician (DXA)	Sacramento
Dental Assistant (DA)	Modesto
Medical Assistant (MA)	Concord, Modesto
International Courses	
International Nurse Graduate Course (ING)	Fresno
Continuing Education Courses	
CPR Course for Basic Life Support (CPR)	All
IV Therapy/Blood Withdrawal Course (IVBW)	Concord, Fresno, Modesto, Sacramento, San Jose
LVN to RN Transition Theory & Lab Course	Concord, Fresno
Essential Medical Bioscience (EMB)	Concord, Fresno, Modesto, San Jose
Magnetic Resonance Imaging (MRI) Intravenous (IV) Blood Withdrawal Course	San Jose
Diagnostic Medical Imaging (DMI) Advanced Clinical Practicum	Concord

ACCREDITATION, APPROVAL, RECOGNITION, MEMBERSHIP

Page 22

Associate of Science in Occupational Therapy Assistant Program (A.S. in OTA)

The A.S. in Occupational Therapy Assistant program at Gurnick Academy of Medical Arts has applied for accreditation and has been granted Candidacy Status by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 6116 Executive Boulevard, Suite 200, North Bethesda, MD 20852-4929. ACOTE's telephone number c/o AOTA is (301) 652-AOTA and its web address is www.acoteonline.org.

The program must have a pre-accreditation review, complete an on-site evaluation, and be granted Accreditation Status before its graduates will be eligible to sit for the national certification examination for the occupational therapy assistant administered by the National Board for Certification in Occupational Therapy (NBCOT).

After successful completion of this exam, the individual will be a Certified Occupational Therapy Assistant (COTA). In addition, all states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination. Note that a felony conviction may affect a graduate's ability to sit for the NBCOT certification examination or attain state licensure.

Please refer to the Gurnick Academy of Medical Arts catalog and addendum for our published policy on the timely completion of all graduation and fieldwork requirements. The student must complete 16 weeks of Level II fieldwork within six (6) months following the completion of the didactic portion of the program.

ADMISSION REQUIREMENTS

Page 26

Table 2. Admission Requirements Summary

Program	Minimum Degree Requirement	Minimum Entrance Exam Score	Admission Point System	Prerequisite Courses	Other General Requirements	Programmatic Requirements	
VN	HSD/GED	CCAT 16	Yes, some campuses only	Yes*	<ul style="list-style-type: none">Be at least 18 years of age.**	Info Session	
MA		CCAT 14	No	No	<ul style="list-style-type: none">Meet with the Admissions Advisor and Financial Aid Advisor (if applicable).	Info Session, Essay, Interview (if applicable).	
DA							
A.O.S. in RT		CCAT 18	Yes		<ul style="list-style-type: none">Pay all applicable fees.	Info Session, Interview (if applicable)	
A.S. in NM		CCAT 18					
A.O.S. in UT		CCAT 18					<ul style="list-style-type: none">Immunization, Health

A.O.S. in CUT A.O.S. in VUT					Screening, Background Check, Drug Testing, and CPR. • Program's performance requirements. • Student skills, hardware, and software requirements (for distance education courses).	(if applicable).
A.S. in MRI		CCAT 18				Info Session, Interview (if applicable).
A.S. in RT		CCAT 18				Info Session, Essay, Interview (if applicable).
A.S. in OTA	HSD/GED	CCAT 15		No		One-on-one Meeting, Essay, Interview.
A.S. in PTA		CCAT 15		No		One-on-one Meeting, Essay, Interview.
ADN & LVN to RN	HSD/GED	See TEAS		Based on the admission pathway		Info Session, Interview.
A.S. in VN	HSD/GED plus proof of graduation from a Board-approved Vocational Nursing Program (min. 2.5 GPA) or completing 1,530 VN program clock hours (BVNPT approved curriculum).	N/A	No	No		N/A

A.O.S. in RC	HSD/GED	CCAT	Yes	No		Info Session, Essay, Resume, Interview, if applicable.
BSN, LVN to BSN, RN to BSN	HSD/GED plus RN license	See TEAS (for BSN and LVN to BSN)	Yes	Yes		Info Session, Essay, Letters of Recommendation, Verification of Health-related Work, Interview (if applicable).
BSN to MSN	BSN (min. 3.0 GPA) plus RN license	N/A	Yes	No		
B.S. in RS	HSD/GED plus two (2) Year Equivalent Imaging education and ARRT® registry or equivalent.	N/A	No	70 Semester credits (Previous core coursework and registry = 54 Semester Credits and 16 Semester Credits for General Education courses).		N/A
B.S. in RT	HSD/GED	CCAT 25	Yes	No		Info Session, Essay, Letters of Recommendation, 40 hours of observation, Interview.
DXA	HSD/GED	CCAT 18	Yes	No		Info Session, Essay, Interview

						(if applicable).
XTMAS	HSD/GED	CCAT 18	Yes	No		Info Session, Interview (if applicable).

* Prerequisite courses may be taken at Gurnick Academy of Medical Arts.

**See Additional Admission Requirements per program for minimum age requirements.

ADDITIONAL ADMISSION REQUIREMENTS PER PROGRAM

Associate of Occupational Science in Respiratory Therapy Program (A.O.S. in RC)

Page 31

Applicants must:

1. Attend or view a live or recorded Information Session.
2. Meet the following admission policies of Gurnick Academy of Medical Arts: immunization, health screening, and background check (see Policies of Gurnick Academy of Medical Arts in School Catalog and "Admissions").
3. Submit original transcripts from the Registrar at an educational institution for those requesting credit granting for courses. Copies of transcripts are not accepted. All coursework must be completed with a grade of at least a "C" and a cumulative grade point average (GPA) of 2.5 (on a 4-point) scale. All credit granting is subject to the Program Director or designee's approval. Please allow seven (7) days for review.
4. Take an Admission Assessment test: The AOSRC program requires applicants to take the CCAT exam
5. Participate in an interview with the Program Director or Designee in person or online.
6. Submit a written essay on why they have chosen this career path.
7. Submit a resume.
8. Before starting this career choice, if an applicant has a criminal record and has been convicted of a felony, it would be in their best interest to contact the Respiratory Care Board (RCB) BEFORE they continue their education endeavors. "Having a prior criminal history does not preclude you from obtaining a license from the Respiratory Care Board of California (RCB). Each applicant for licensure must submit their fingerprints to the California Department of Justice and Federal Bureau of Investigation for a criminal history background check. Upon notification of an applicant's criminal history, if any, the RCB will open an investigation to determine whether there is a basis to deny the application for licensure."

Associate of Occupational Science in RC Admission Point System

Applicants are deemed qualified on a point system. The highest-ranked (above a minimum) will be offered seats in the program. The following point system evaluates each applicant, showing the maximum score achievable. If an accepted applicant chooses to decline their seat in the upcoming term, they must reapply for admission in any future term. The applicant must go through the application process again, including meeting all current admission requirements and deadlines.

Table 4. A.O.S. In RC Admission Point System

Criteria	Possible Points
I. Admissions Exam	50
II. Post-Secondary Education	15
• Associate Degree	5
• Baccalaureate Degree	10
• Graduate/Master's Degree	15
III. Essay	
IV. Resume	
V. Health Care Background	5
• One to three (1 – 3) years	3
• More than three (3) years	5

Total Possible Points for Criterion I through Criterion IV: 70 Points

Associate of Occupational Science in Radiologic Technology Program (A.O.S. in RT)

Page 32

Table 5. A.O.S. in RT Admission Point System

Points Category:	Possible Points
I. CCAT	50
II. Credit Granted Courses	130
• Algebra I or higher	30
• Anatomy	30
• Physiology	30
• Ethics and Law in Radiology	10
• English Reading and Composition	10
• Sociology	10
• Medical Terminology	10

III. Post-Secondary Education	50
• Associate degree	25
• Bachelor's degree	50
IV. One-Page Resume	10
V. Essay – One-page, APA Format	10
The essay will include:	
<ul style="list-style-type: none"> • Statement of why you would like to join this modality • The essential functions and role of a technologist in this field • Preparation to become successful in this program • APA Title page and sources used to prepare for the essay (Title page and sources can be on a separate page) 	
VI. Health Care Background	60
• One to three (1 – 3) years	20
• More than three (3) years	30
• Radiology Community Involvement	30
<i>Radiology Community Involvement consists of volunteering in a Radiologic Technology department, attending an online or live conference in Radiologic Technology, or participating in a Career Discussion Panel. A signed and dated certificate of attendance from Human Resources, Volunteer Services, or an authorized Director of Imaging, or a signed and dated certificate from a sanctioned event will be required for points. Every eight hours of documented volunteer time in an imaging department or conference is worth ten (10) points, with a maximum of 30 points.</i>	
VII. Personal Interview	120
<ul style="list-style-type: none"> • Interview Questions • Appearance and Demeanor • Communication Skills • Maturity • Overall Impression • Holistic Evaluation 	
Possible Total Points:	430

Associate of Science in Physical Therapist Assistant Program (A.S. in PTA)

Page 43

The Physical Therapist Assistant Program has a selective application process. There is a deadline for the submission of completed applications. Please inquire with Admissions about the current deadline date.

1. All applicants must attend a one-on-one meeting with the Admissions Team advisor to receive specific information about admission requirements, program and clinical rotation scheduling,

and financial aid resources. A packet of registration documents will be given to applicants to complete and return.

2. All applicants must submit official transcripts.
3. Submit — for applicants requesting credit granting for some/all General Education courses — original transcripts from the Registrar at an educational institution. Copies are not accepted. All coursework must be completed and given a grade of at least a “C.” Anatomy and Physiology with Laboratory must be completed within the last five (5) years. All credit granting is subject to approval from the Registrar. Please allow seven (7) days for review.
4. For any applicant with work, volunteer, or observation experience please submit the Verification of Observation Hours form. All documentation must be submitted by the application deadline.

The Verification of Observation Hours form and instructions are in the Application/Registration packet that you can download from the website.

Applicants must submit all required documents by the application deadline. Only complete applications will be considered. Please plan for the time to submit official transcripts and the completion of observation hours.

5. The PTA Admissions Committee will review all applications and approve the 40 top-scoring applicants for an on-campus interview and essay writing. Please see the scoring rubric.
The interview criteria are based upon ‘Generic Abilities’ identified through a study published by UW-Madison. Interviews will be scheduled for 15 – 20 minutes. Applicants will also have additional time to complete a short Application Essay and Pre-Admission Questionnaire. Applicants will be reminded to complete their online FAFSA application for federal student aid.
6. The 20 top-ranking applicants will be offered seats in the program with up to ten (10) alternates. Selected applicants must accept the seat within 72 hours of receiving the formal acceptance letter.

A.S. in PTA Admission Point System

Please review the PTA Admission Point System table to help you prepare. Applicants not selected may re-apply. The following point system evaluates and ranks each applicant, showing the maximum score achievable.

Table 13. A.S. in PTA Admission Point System

High School Diploma/GED		required	
College Education (official transcripts required)			
❖ Associate’s degree		20	
❖ Bachelor’s or higher degree		30	
➤ Kinesiology major		50	
Attend one-on-one meeting with Admissions Team		required	
In-person observation hours > 10 hours (optional)		10	

Work experience in a Physical Therapy Facility	10: 1 - 249 hrs 20: 250 - 499 hrs 30: 500 - 749 hrs 40: 750 - 999 hrs 50: 1000+ hours	
CCAT Assessment Test (minimum score of 15 points required)	15 - 50	
Pre-Interview Points Possible	180	
Interview	120	
Essay	40	
Total Points Possible	340	

Interview criteria are based upon Generic Abilities identified through a study at the UW-Madison. These abilities are attributes leading to success in the field of Physical Therapy

Bachelor of Science in Radiologic Sciences Program (B.S. in RS)

Page 47

1. Have completed 2-year or equivalent education and passed an ARRT® registry or equivalent (ARDMS, ARMRT, etc.) in one of the following: Radiography, Nuclear Medicine, Diagnostic Medical Sonography, Cardiovascular Sonography, MRI, or Radiation Therapy (credit granted for a combination of past core coursework and registry or equivalent = 54-semester credits.)
2. Have completed 16 semester credits of General Education courses that are not a part of the B.S. in DMI Program.
3. Proof of credentialing certification.
4. Submit official transcripts.

5. Complete an application for admission.
6. Have a high school diploma or GED and be at least 18.
7. Have a reliable computer, Internet access, and a working email address.
8. Per the current fee schedule, they must pay all applicable fees before issuing an enrollment contract or making other payment arrangements acceptable to the school.
9. Meet all admission requirements.

Bone Densitometry Technician Program (DXA)

Page 53

1. Submit an essay (no longer than two (2) pages, typed, double-spaced) that describes the following:
 - a. Reasons for the applicant's desire to become a Bone Densitometry Technician.
 - b. The applicant's attributes that will support the profession and their ability to complete the DXA program.
 - c. Describe the support system, such as a person, time management, and resources to support the applicant's efforts and success in the program.
2. Submit all required clinical documentation prior to acceptance into the program. Failure to submit all required clinical documentation before enrollment will result in the student's acceptance being rescinded. For a comprehensive list of requirements, please contact an Admissions Advisor or refer to the Immunization Requirements section of this Catalog.
3. In some campuses, the applicant pool may be larger than the number of available seats at the desired campus. In this case, the campus may require an additional step, such as an interview with the Program Director, Assistant Program Director, or designees.

Bone Densitometry Technician (DXA) Admission Point System

Applicants are deemed qualified on a point system. The highest-ranked (above a minimum) will be offered seats in the program. The following point system evaluates each applicant, showing the maximum score achievable. If an accepted applicant chooses to decline their seat in the upcoming term, they must reapply for admission in any future term. The applicant must go through the application process again, including meeting all current admission requirements and deadlines.

Table 17. DXA Admission Point System

Points Category:	Possible Points
I. Admissions Exam - CCAT	50
II. Post-Secondary Education	20
● Gurnick Academy of Medical Arts Graduate or Currently Enrolled	10
● Associate Degree/Military Service	15
● Baccalaureate Degree	20
III. One-Page Resume (required)	25

IV. Essay – One-page, APA Format	25
The essay will include:	
<ul style="list-style-type: none"> - Statement of why you would like to join this modality. - The essential functions and role of a technician in this field. - Preparation to become successful in this program. - Sources used to prepare for the essay. 	
V. Health Care Background	20
<ul style="list-style-type: none"> ● One to three (1 – 3) years 	10
<ul style="list-style-type: none"> ● More than three (3) years 	20
Possible Total Points:	140

RE-ENROLLMENT

Page 76

Expulsion

Students can be expelled involuntarily by Gurnick Academy of Medical Arts for two main reasons: academic and disciplinary.

Academic Expulsion

Individuals expelled for academic reasons can be re-enrolled into the same program one (1) time and are not eligible for remediation. A re-enrolled student (previously expelled for academic reasons) is placed on academic probationary status and is not eligible for remediation.

The academic probationary status is lifted once the student graduates from the program. Re-enrolled students with academic probationary status are not eligible for financial aid until they successfully pass the course they are repeating with a grade of 'C' or higher. Once the student passes the course with a letter of 'C' or higher, the student may be eligible to receive Financial Aid.

Students expelled for cheating must complete an additional online ethics course before being eligible for re-enrollment.

Individuals expelled for a second time are not permitted to re-enroll.

Disciplinary Expulsion

Individuals expelled for disciplinary reasons are not permitted to re-enroll in the same program and may not be eligible for enrollment at Gurnick Academy of Medical Arts. Please read Disciplinary Probation for details.

Disciplinary Expulsion

Individuals expelled for disciplinary reasons are not permitted to re-enroll in the same program and may not be eligible for enrollment at Gurnick Academy of Medical Arts. Please read Disciplinary Probation for details.

ADVANCED PLACEMENT & CREDIT GRANTING

Page 82

Bachelor of Science in Radiologic Sciences (B.S. in RS)

Credits earned from courses or programs accredited by an agency recognized by the United States Department of Education (U.S.DOE) or the Council for Higher Education Accreditation (CHEA).

LICENSURE, CERTIFICATION, & REGISTRY DISCLAIMER

Page 88

Associate of Science in Nuclear Medicine Technology Program (A.S. in NM)

In California, practicing nuclear medicine technologists must have an active Certified Technologist, Nuclear Medicine (CTNM) certificate. The California Department of Public Health, Radiologic Health Branch, offers the certificate. Once certified, the nuclear medicine technologist can legally practice within California.

Graduates of our Nuclear Medicine Technology program are eligible to sit for both the Nuclear Medicine Technology Certification Board (NMTCB) Certified Nuclear Medicine Technologist (CNMT) board exam and the American Registry of Radiologic Technologists (ARRT®) Nuclear Medicine Technology (N) board exam. Both the ARRT® and NMTCB require applicants to disclose any history of criminal or misdemeanor proceedings. Students may choose to contact the ARRT® and/or NMTCB to conduct a pre-application review to determine if they will be eligible to sit for the exam(s) upon graduation.

California Department of Public Health, Radiologic Health Branch contact information is MS 7610, P.O. Box 997414, Certification Unit, Sacramento, CA 95899-7414, Phone: (916) 327-5106, Fax: (916) 440-7999, Web: <https://www.cdph.ca.gov/Programs/CEH/DRSEM/Pages/RHB-Contact.aspx>.

SAFETY & CAMPUS SECURITY

Page 124

Access

Through approved access control, Gurnick Academy of Medical Arts campuses will be open to students, employees, contractors, guests, and invitees during business hours. Access to all Gurnick Academy of Medical Arts facilities is through the Verkada Pass application for students and staff and through a key fob for contractors, temporary personnel, and visitors.

Verkada is a comprehensive security system that allows Gurnick’s safety team to monitor and control access to the building and other parts of the campus. This allows for enhanced security to maintain a high level of safety for students and staff at Gurnick Academy of Medical Arts. Campus entrances to the building, classrooms, skills lab, simulation labs, and administrative areas will be secured behind locked doors that require the user to have the proper permissions to enter.

To gain access, the user will need to download and install the Verkada application onto their mobile device. The mobile device will interact with access units located throughout the campus that will unlock doors to specific locations based on the user’s role. By downloading the Verkada application, the user acknowledges that this is voluntary and will not hold Gurnick Academy responsible for any damages, perceived or actual, to the mobile device by downloading, installing, and using the Verkada software. Users are free to uninstall the application at any time.

Users who do not want to download the Verkada application can still gain access to the building by showing their photo ID badge to the camera on the access unit and being “buzzed” in by the front desk. Access to the campus will be revoked once the user is no longer associated with Gurnick.

STANDARDS OF SATISFACTORY ACADEMIC PROGRESS

ASSOCIATE OF OCCUPATIONAL SCIENCE IN CARDIAC ULTRASOUND TECHNOLOGY PROGRAM (A.O.S. IN CUT)

Page 177

Institution Mission

Gurnick Academy of Medical Arts' mission is to offer quality allied health and nursing programs that integrate professional skills, career-focused education, and hands-on practical experience by empowering students to develop and achieve their personal and career goals.

A.O.S. in CUT Program Goals

To prepare competent entry-level sonographers in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains for the adult cardiac sonography concentration.

A.O.S. in CUT Program Objectives

- Train students to be professional and competent Cardiac sonographers in the medical imaging community by developing their visual, oral, and written communication and critical thinking skills.
- Develop interpersonal skills in communicating and interacting with patients of all generations, cultures, and medical conditions.
- Develop interpersonal skills in communicating and interacting with medical and administrative personnel in the medical imaging setting so they will be effective team players.
- Teach students knowledge and understanding of human physiology, pathology, and pathophysiology.
- Teach students knowledge and understanding of ultrasound physical principles and instrumentation.
- Teach students the knowledge of sonographic biological effects and proper application of sonographic instrumentation relative to imaging and image quality.
- Teach students knowledge and understanding of human gross and sectional anatomy relative to normal and abnormal sonographic imaging.
- Teach students how to produce quality diagnostic images of the heart with the required information contributing to the diagnostic process.
- Teach students the necessary skills for proper patient care while utilizing ethical, professional, and HIPAA guidelines.
- Provide students with the knowledge, clinical skills, problem-solving abilities, and interpersonal skills to practice in the profession of sonography.
- Emphasize the importance and need of becoming credentialed in the profession of Cardiac Sonographer.
- Prepare students to pass the ARDMS certification exam.
- Teach and emphasize the appropriate ergonomic scanning applications for the Cardiac Sonographer's well-being.

ASSOCIATE OF OCCUPATIONAL SCIENCE IN RADIOLOGIC TECHNOLOGY PROGRAM (A.O.S. IN RT)

Page 181

A.O.S. in RT Program Information, Length, and Schedule

The program information, length, and schedule may change. Read the accompanying Addendum for changes and updates, and connect with an Admission Advisor for more details.

The A.O.S. in Radiologic Technology program provides a library and classrooms with modern media teaching aids, textbooks, journals, periodicals, anatomical charts, phantoms, and energized lab equipment.

The Associate of Occupational Science in Radiologic Technology program consists of 157.5 quarter credit hours completed over 94 weeks for day and night students, for 2,923 contact hours. Before graduation, students must complete 1,880 hours of clinical practice.

Didactic courses are scheduled during the day or evening, depending on the designated program track. Students can expect to engage in approximately 40 hours of instruction per week, which includes didactic coursework, laboratory sessions, and clinical training. Clinical rotations may take place on weekdays or weekends, with shift assignments varying by clinical site, including day, evening, or overnight (graveyard) shifts. Didactic courses are offered between 8:00 AM and 10:30 PM to accommodate program scheduling requirements.

ASSOCIATE OF SCIENCE IN RADIOLOGIC TECHNOLOGY PROGRAM (A.S. IN RT)

Page 211

A.S. in RT Program Information, Length, and Schedule

The program information, length, and schedule may change. Please read the accompanying Addendum for changes and updates. Connect with an Admission Advisor for details.

The A.S. in Radiologic Technology program provides a library and classrooms with media teaching aids, textbooks, journals, periodicals, anatomical charts, phantoms, and energized lab equipment.

The Radiologic Technology program is an Associate of Science degree program. The student will receive didactic, laboratory, and clinical experience in affiliated medical facilities. The Instructor-to-Student ratio is 1:30 during residential lectures, 1:25 during online lectures, 1:10 in the laboratory, and 1:1 during clinical externships.

Didactic courses are scheduled during the day or evening, depending on the designated program track. Students can expect to engage in approximately 40 hours of instruction per week, which includes didactic coursework, laboratory sessions, and clinical training. Clinical rotations may take place on weekdays or weekends, with shift assignments varying by clinical site, including day, evening, or overnight (graveyard) shifts. Didactic courses are offered between 7:00 AM and 10:00 PM to accommodate program scheduling requirements.

The program's affiliated clinical sites hold current state-issued certificates as approved clinical sites. The clinical sites provide supervised clinical instruction in the patient care setting. All clinical sites employ radiologic technologists and supervisors/operators (doctors) who hold certification from the State of California Radiologic Health Branch.

BSRS Program Mission

To equip diagnostic and therapeutic imaging professionals with advanced education and leadership skills for career advancement in healthcare.

BSRS Program Description

The online Bachelor of Science in Radiologic Sciences (BSRS) program is designed to prepare certified diagnostic and therapeutic imaging professionals for advanced roles in the radiologic sciences. This program equips students with the expertise, leadership, and critical thinking skills required to meet the demands of today's healthcare industry. Graduates of the B.S. in Radiologic Sciences program are well-prepared to assume leadership positions, advance their careers, and make meaningful contributions to the healthcare field.

The B.S. in Radiologic Sciences degree is available entirely through the distance education delivery method. This program offers advancement for technologists who cannot attend a traditional college. The entire BSRS program is 121 semester credit hours. Qualified applicants may earn up to 70 semester credit hours of advanced standing. The courses are listed in the following tables. Included are courses that will enhance the student's understanding of imaging specialties depending on which specialty track the student chooses.

- **Imaging Informatics** – Training to prepare students for PACS and RIS administrator roles, while also providing the foundational knowledge needed to pursue credentialing as a Certified Imaging Informatics Professional (CIIP). Through specialized coursework, students gain the expertise that helps them prepare for the exam and advance their careers in the growing field of imaging informatics.

- **Leadership and Management** – Training in the Leadership and Management courses will prepare students for healthcare administration and management positions within imaging and radiologic sciences. Additionally, this track provides foundational knowledge and skills to help students prepare for the Certified Radiology Administrator (CRA) exam, enhancing their qualifications for leadership roles in hospitals, imaging centers, and healthcare organizations.
- **Education** – Training in the Education courses will equip students with the skills needed to become an effective instructor in radiologic sciences. Designed for imaging professionals who are passionate about teaching, this track prepares students for a rewarding career in imaging education, helping shape future technologists and leaders in the field.
- **Mammography** – Training in the Mammography courses will include all MQSA-mandated material and an emphasis on mammography registry review. This track will cover mammography exam content specifications and review the California state mammography exam. It will include 16 hours of structured education required for the Mammography post-primary examination.
- **Computed Tomography** – Training in the CT courses will include an overview of the body's cross-sectional images and offer didactic educational experiences to provide the student with the necessary knowledge and skills to become an entry-level CT technologist. Students will learn the physics and instrumentation of computed tomography, clinical procedures and protocols, patient care, and radiation safety with a registry review to help prepare students for the post-primary exam. This track's completion will meet the 16 hours of structured education for the CT post-primary examination.
- **MRI (Magnetic Resonance Imaging)** – Training in the MRI courses will include the academic framework covering physical principles of MRI, advanced MRI applications, including sectional anatomy, and MRI Safety and Registry Review. This track's completion will meet the 16 hours of structured education for the MRI post-primary examination.
- **Nuclear Medicine** – Training in the Nuclear Medicine track will encompass comprehensive courses in advanced nuclear cardiology, PET/CT imaging, and radiation safety. Students will engage in an immersive educational experience, equipping themselves with the knowledge and skills necessary to sit for one or more advanced examinations administered by the Nuclear Medicine Technology Certification Board (NMTCB). These specialized courses are designed to enhance students' confidence and preparedness for the certification process.
- **Radiation Therapy** – Training in the Radiation Therapy track will encompass didactic coursework covering essential topics such as Professionalism in Radiation Therapy, Advanced Modalities in Radiation Therapy, and Dosimetry and Treatment planning. Through this structured didactic coursework, radiation therapists will develop a robust understanding of both the technical and ethical dimensions of radiation therapy practice, preparing them for successful careers in this vital healthcare field. By deepening their expertise in such areas, licensed radiation therapists will be better equipped to navigate complex clinical scenarios, implement cutting-edge technologies, and ensure high standards of patient care. This comprehensive education will empower them to take on leadership roles, engage in critical decision-making, and contribute to the evolution of practices within the field.

The BSRS degree is available entirely through the distance education delivery method. This program offers advancement for technologists who are unable to attend traditional college. Registered technologists may earn up to 70 semester credit hours of advanced standing. The courses are listed in Table 30 and include courses that will enhance the student's understanding of medical imaging as well as the specialty courses depending on which track the student chooses.

BSRS Program Goals and Objectives

Our mission is to prepare imaging professionals with higher education, leadership skills, and opportunities for upward mobility in the healthcare field.

- Students will develop the requisite skills to function in advanced roles within the radiologic sciences.
- Students will develop advanced communication skills to effectively engage with healthcare members and patients, ensuring clarity, empathy, and professionalism.
- Students will demonstrate the critical thinking and problem-solving skills of a supervisory-level healthcare professional.
- Students will acquire the advanced knowledge and skills necessary to excel in specialized and advanced roles within the radiologic sciences profession.
- Students will create a professional e-portfolio that displays academic and professional achievements for career advancement.

MASTER OF SCIENCE IN NURSING PROGRAM (BSN TO MSN)

Page 233

MSN Program Mission Statement

The mission of the Master of Science in Nursing (MSN) program is to prepare nursing professionals to excel as educators, leaders, and innovators in healthcare. We provide a rigorous, evidence-based education that enhances clinical expertise, promotes ethical decision-making, and fosters

interdisciplinary collaboration. Our graduates are equipped to advance nursing practice, improve patient outcomes, and contribute to the health and well-being of diverse communities through leadership, research, and education.

MSN Program Goals

- **Develop Advanced Clinical Competence:** Equip students with the knowledge and skills necessary to deliver advanced nursing care, utilizing the latest evidence-based practices to improve patient outcomes across diverse populations.
- **Foster Leadership and Advocacy:** Prepare students to assume leadership roles in healthcare settings, advocating for policy changes, improving healthcare systems, and driving innovations in nursing practice.
- **Promote Interprofessional Collaboration:** Encourage effective collaboration among healthcare professionals by fostering communication, teamwork, and shared decision-making to enhance patient care and healthcare delivery.
- **Enhance Ethical and Legal Practice:** Instill a deep understanding of ethical principles, legal standards, and cultural sensitivity in students, ensuring they practice with integrity and uphold the highest standards of nursing care.
- **Support Research and Scholarly Inquiry:** Cultivate a commitment to research and scholarly inquiry, encouraging students to contribute to the body of nursing knowledge and engage in practices that are informed by the latest research findings.
- **Commit to Lifelong Learning and Professional Growth:** Encourage continuous professional development and lifelong learning, preparing graduates to adapt to the ever-changing healthcare environment and advance the nursing profession throughout their careers.

MSN Program Outcomes

- **Advanced Clinical Expertise:** Graduates will demonstrate advanced clinical skills and critical thinking abilities necessary to provide high-quality, patient-centered care across diverse populations and healthcare settings.
- **Leadership and Management:** Graduates will exhibit leadership and management skills that enable them to effectively guide healthcare teams, influence healthcare policy, and promote positive change within healthcare organizations.
- **Evidence-Based Practice:** Graduates will integrate evidence-based knowledge and research into nursing academia and clinical practice to improve patient outcomes and contribute to the advancement of the nursing profession.
- **Interdisciplinary Collaboration:** Graduates will effectively collaborate with interdisciplinary healthcare teams to enhance patient care, promote health equity, and address complex healthcare challenges.
- **Ethical and Legal Competence:** Graduates will apply ethical principles and a thorough understanding of healthcare laws and regulations to guide their practice, ensuring the delivery of safe, ethical, and culturally competent care.
- **Lifelong Learning and Professional Development:** Graduates will commit to lifelong learning and continuous professional development, staying abreast of emerging trends in healthcare and advancing their knowledge and skills throughout their careers.

COURSE DESCRIPTIONS

Page 259

Associate of Occupational Science in Vascular Ultrasound Technology (A.O.S. in VUT) Courses – Blended Program

VU 300 – Cerebrovascular Sonography – 48 Clock Hours/4.5 Quarter Credit Hours

Prerequisite: Completion of Quarter I, II, VU 400, and VU 401 courses with a “C” or better is required.

This course covers extracranial and intracranial sonography. The anatomy of the extracranial and intracranial systems, and normal and abnormal findings will be covered. Protocols and scanning techniques required for diagnostic exams will be taught.

VU 300L – Cerebrovascular Sonography Lab— 48 Clock Hours/2 Quarter Credit Hours

Prerequisite: Completion of Quarter I, II, VU 400, and VU 401 courses with a “C” or better is required.

Extracranial and intracranial Doppler will be the focus of this course, primarily carotid artery ultrasound and TCD exams. Students will learn to use Doppler velocities and create ratios that determine normal vs. abnormal flow. Students will learn carotid and TCD protocols and hands-on scanning techniques to perform the exam in 45 minutes.

VU 301 – Abdominal Vascular Sonography – 84 Clock Hours/8 Quarter Credit Hours

Prerequisite: Completion of Quarter I, II, and III courses with a “C” or better is required. Concurrent enrollment is required with all Quarter IV VU courses.

Abdominal Vascular Sonography teaches abdominal vascular vessels and basic protocols that pertain to ultrasound examinations of the abdominal vascular system. This course establishes foundations for scanning techniques, protocols, and patient body habitus variations.

Students will gain an understanding of the role a sonographer plays in the diagnosis of diseases of the abdominal vascular system by understanding what the criteria for “normal is.” Students will also understand how to identify pathology in the abdominal vascular system. They will recognize spectral Doppler and color on normal and diseased waveforms of the abdominal vascular system.

VU 301L – Abdominal Vascular Sonography Lab – 84 Clock Hours/4 Quarter Credit Hours

Prerequisite: Completion of Quarter I, II, and III courses with a “C” or better is required. Concurrent enrollment is required with all Quarter IV VU courses.

Abdominal Vascular Sonography Lab is concurrent with Abdominal Vascular Sonography, VU 301. Students will practice the protocols and scanning techniques of the abdominal vascular system within the lab.

VU 400 – Lower Extremity Venous System – 48 Clock Hours/4.5 Quarter Credit Hours

Prerequisite: Completion of Quarter I, II, and VU 401 courses with a “C” or better is required. Concurrent enrollment is required with all Quarter III VU courses.

Students will learn vascular terminology and advanced vascular physical principles. This course's main focus will be the anatomy and hemodynamic characteristics of the lower extremities veins. Scanning techniques and protocols will be taught and challenged in the clinical setting.

VU 400L – Lower Extremity Venous System Lab – 40 Clock Hours/2.0 Quarter Credit Hours

Prerequisite: Completion of Quarter I, II, and VU 401 courses with a "C" or better is required. Concurrent enrollment is required with all Quarter III VU courses.

This course will review Doppler sonography within the lab setting. Students will learn techniques and skills for optimizing the lower extremity venous examination. The focus of this course is the lower extremity venous system protocol. Superficial venous vein mapping will also be included in this course. This will introduce and prepare students for studies for deep vein thrombosis, venous disease, and superficial venous disease.

VU 401 – Lower Extremity Arterial System – 40 Clock Hours/4 Quarter Credit Hours

Prerequisite: Completion of Quarter I and II courses with a "C" or better is required. Concurrent enrollment is required with all Quarter III VU courses.

Students will learn vascular terminology and advanced vascular physical principles. Anatomy and hemodynamic characteristics of the lower extremity arterial system will be the main focus of this course. Scanning techniques and protocols will be taught and challenged in the clinical setting.

VU 401L – Lower Extremity Arterial System Lab – 40 Clock Hours/2 Quarter Credit Hours

Prerequisite: Completion of Quarter I and II courses with a "C" or better is required. Concurrent enrollment is required with all Quarter III VU courses.

This course will review Doppler sonography within the lab setting. Students will learn techniques and skills for the optimization of the vascular examination. The focus is on the lower extremity arterial system protocol. Indirect assessment of the arteries will also be introduced and taught with the lab's ABI machine. This will introduce and prepare students for studies on peripheral vascular disease.

VU 402 – Upper Extremity Venous System – 36 Clock Hours/3.5 Quarter Credit Hours

Prerequisite: Completion of Quarter I, II, III courses with a "C" or better is required. Concurrent enrollment is required with all Quarter IV VU courses.

Upper extremity venous vascular protocols are the main focus of this course. Vascular hemodynamics and physical principles are reviewed and practiced. Scanning skills and techniques are taught to recognize the normal and abnormal anatomy and disease (and disease processes) of the upper extremities.

VU 402L – Upper Extremity Venous System Lab – 36 Clock Hours/1.5 Quarter Credit Hours

Prerequisite: Completion of Quarter I, II, III courses with a "C" or better is required. Concurrent enrollment is required with all Quarter IV VU courses.

Upper extremity venous protocols will be demonstrated, practiced, and evaluated. Students will learn scanning techniques of required anatomy and what is required to prove normal vs. abnormal.

VU 403 – Upper Extremity Arterial System – 28 Clock Hours/2.5 Quarter Credit Hours

Prerequisite: Completion of Quarter I, II, III courses with a “C” or better is required. Concurrent enrollment is required with all Quarter IV VU courses.

Upper extremity arterial vascular protocols are the main focus of this course. Vascular hemodynamics and physical principles are reviewed and practiced. Scanning skills and techniques are taught to recognize the normal and abnormal anatomy and disease (and disease processes) of the upper extremities.

VU 403L – Upper Extremity Arterial System Lab – 28 Clock Hours/1 Quarter Credit Hour

Prerequisite: Completion of Quarter I, II, III courses with a “C” or better is required. Concurrent enrollment is required with all Quarter IV VU courses.

This course will review Doppler sonography within the lab setting. Students will learn techniques and skills for optimizing the upper arterial vascular examination. Students will be taught upper arterial extremity protocols. Indirect assessment of the arteries will also be introduced and taught with the lab's ABI machine. This will introduce and prepare students for peripheral vascular disease.

Associate of Science in Physical Therapist Assistant (A.S. in PTA) Courses – Blended Program

PTA 120A – Clinical Kinesiology with Lab, Term 1 – 45 Clock Hours/2.5 Quarter Credit Hours

Prerequisite: None

This course provides knowledge of the principles of mechanics and musculoskeletal anatomy and how they relate to human motion and the field of physical therapy. The concepts of locomotion, forces, and levers are introduced. Topics include muscle origins, insertions, and actions.

Laboratory experiences correlate to the lectures and include manual muscle testing and goniometry. Students will be expected to achieve competency on a given list of skills. Part 1 covers the lower extremity. Part II covers the upper extremity. This course is aligned by a body system with PTA 220.

PTA 120B – Clinical Kinesiology with Lab, Term 2 – 32 Clock Hours/2 Quarter Credit Hours

Prerequisite: None

This course provides knowledge of the principles of mechanics and musculoskeletal anatomy and how they relate to human motion and the field of physical therapy. The concepts of locomotion, forces, and levers are introduced. Topics include muscle origins, insertions, and actions.

Laboratory experiences correlate to the lectures and include manual muscle testing and goniometry. Students will be expected to achieve competency on a given list of skills. Part 1 covers the lower extremity. Part II covers the upper extremity. This course is aligned by a body system with PTA 220.

PTA 220A – Orthopedic Management and Related Therapeutic Exercise, Term 1 – 42 Clock Hours/2.5 Quarter Credit Hours

Prerequisite: None

This course provides an introduction to orthopedic-related conditions commonly seen in Physical Therapy. Basic exercise principles and their application are covered with laboratory discussion, demonstration, and practice. Students will be expected to achieve competency on a given list of skills. Part 1 covers the lower extremity, and Part II covers the upper extremity. This course is aligned by a body system with PTA 120.

PTA 220B – Orthopedic Management and Related Therapeutic Exercise, Term 2 – 24 Clock Hours/1.5 Quarter Credit Hours

Prerequisite: None

This course provides an introduction to orthopedic-related conditions commonly seen in Physical Therapy. Basic exercise principles and their application are covered with laboratory discussion, demonstration, and practice. Students will be expected to achieve competency on a given list of skills. Part 1 covers the lower extremity, and Part II covers the upper extremity. This course is aligned by a body system with PTA 120.

B.S. in Diagnostic Medical Imaging (B.S. in DMI) Courses – Distance Education (Online) Program

RS 320 – Research in Healthcare – 45 Clock Hours/3 Semester Credit Hours

Prerequisite: None

This course will provide the radiologic science professional with an opportunity to demonstrate the ability to apply information literacy skills to efficiently and effectively practice evidence-based practice/medicine in patient-care settings. This is a foundation course covering citation basics, searching databases effectively, reading research efficiently, and evaluating information with a critical eye. This course will introduce students to the research cycle from question to scholarly dissemination. Examples of various research methods and techniques will be discussed.

RS 330 – Advanced Radiobiology – 60 Clock Hours/4 Semester Credit Hours

Prerequisite: None

This course will provide the radiologic science professional with theories and principles of the interaction of ionizing radiation with living systems. Radiation effects on biologic molecules & organisms and factors affecting biological response are explored. Acute and long – term effects of ionizing radiation exposure are discussed. Applications in diagnostic and therapeutic settings are presented.

RS 340 – Health Economics and Policy – 60 Clock Hours/4 Semester Credit Hours

Prerequisite: None

This course is designed to teach students about the health care system and the laws that govern it. It provides an overview of health care systems, such as spending, health care markets, demands for health care, insurance, managed care, hospital and physician services networks, drug companies, and Medicare and Medicaid systems.

RS 350 – Cultural Competence in Health Care – 45 Clock Hours/3 Semester Credit Hours

Prerequisite: None

This course serves as an essential guide for delivering safe and effective cross-cultural care in healthcare settings. By blending theoretical foundations with practical applications, it begins with an introduction to clinical cultural competence. The course illustrates how to implement cultural competence across a variety of populations and addresses specific considerations for working with distinct groups.

RS 360 – Health Science Management – 60 Clock Hours/4 Semester Credit Hours

Prerequisite: None

This course is designed to provide entry – level managers with a wide variety of tools and theories from which to choose. A marked focus is offered on evaluation and resolution of personnel issues. An emphasis is placed on the ultimate responsibility of supervisors and managers for the performance of their staff. The text provides information and guidance to obtain maximum results from others. Getting things done through people is a key component of this text.

RS 370 – Professional Capstone Portfolio Project – 45 Clock Hours/3 Semester Credit Hours

Prerequisite: None

This is an independent study project, where students will prepare a professional E – portfolio. This portfolio is to be worked on by the BSRS students throughout the course of the entire program starting from their first Semester until completion of the BSRS program and is to be composed of a multitude of individual projects and documents preparing the student for professional practice as an imaging professional with BSRS. This portfolio serves as the exit project for the Bachelor Degree Program in Nursing at Gurnick Academy of Medical Arts.

RS 410 – Leadership and Performance – 45 Clock Hours/3 Semester Credit Hours

Prerequisite: None

Leadership and performance is a dynamic exploration of Universal Laws of Performance and how to apply them both personally or to any organization. Used by notable businesses worldwide these laws open doors to discover and create cultures within a company that will literally alter the course of any organization. Using case studies of three organizations this course guides you to discover the universal laws and how to apply them now.

RS 420 – Operations and Human Resource Management in Radiology – 45 Clock Hours/3 Semester Credit Hours

Prerequisite: None

This course focuses on a variety of issues, including the application of Operations Management techniques in the context of radiologic and diagnostic imaging. We will identify protocols, policies, and procedures; marketing services; customer management and satisfaction methods. This course will provide the student with the foundation necessary to address the day-to-day issues an imaging administrator will experience. This course will foster the student's goal to achieve their Certified Radiology Administrator Certification (CRA).

This course will also cover one of the more challenging aspects of the profession: Human Resource Management, and will address the needs of the administrator, regardless of the setting. We will discuss methods used in planning, recruitment, training, and retention. Changes that occur as a result of employment patterns and demographics require medical imaging administrators to develop skills to manage an ever-changing environment. We will explore and develop the necessary tools and resources for the future of this profession regardless of the setting.

RS 430 – Financial and Asset Management in Radiology – 45 Clock Hours/3 Semester Credit Hours

Prerequisite: None

This course will represent a cross section of today's imaging profession and give students insight and knowledge on the financial and asset management system in Radiology and its processes. This is a course that will aid imaging professionals in the preparation of the Certified Radiology Administer examination by providing education materials specific to the field. This course will discuss in depth insights and analyses on various subjects pertaining to financial and asset management and also discuss Strategic planning and implementing a SWOT analysis to increase total performance.

RS 440 – Imaging Informatics in Radiologic Sciences – 45 Clock Hours/3 Semester Credit Hours

Prerequisite: None

This course provides a comprehensive exploration of imaging informatics, incorporating concepts and applications. Students will study information technology in medical imaging, the capabilities and supervision of imaging modalities, integration of systems, and the establishment of programs for image display quality control. The course also emphasizes the recognition and mitigation of hazards within the healthcare environment, preparing students to apply advanced informatics principles in clinical settings.

RS 450 – Communication & Education in Imaging Informatics – 45 Clock Hours/3 Semester Credit Hours

Prerequisite: None

This is an inclusive course discussing the roles and relationships in healthcare settings, medical terminology, communications relating to system availability or changes, feedback, and feedback mechanisms. Furthermore, this course will explore performance needs assessment, training programs, implementation training and evaluations of effectiveness training. This course prepares students for the Imaging Informatics Professional Certification exam, offered by the American Board of Imaging Informatics (ABII).

RS 460 – Systems Management in Imaging Informatics – 45 Clock Hours/3 Semester Credit Hours

Prerequisite: None

This course will explore procurement, project management, and operations of digital imaging systems. Additionally, systems management will be introduced including; cost analysis, system capacity, throughput, disaster plan recovery, business continuity strategies, use problem management, data migration procedures and data security and individual privacy. This course prepares students for the Imaging Informatics Professional Certification exam, offered by the American Board of Imaging Informatics (ABII).

RS 510 – Principles of Computed Tomography – 45 Clock Hours/3 Semester Credit Hours

Prerequisite: None

This course is designed to introduce the student to the concept of digital imaging processing and image quality. Students will discuss and identify the concepts of data acquisition. In addition, knowledge of the basic principles of sectional anatomy and CT protocols and procedures as it relates to various parts of the body will be analyzed. Course topics will include: digital imaging processing, data acquisition concepts, radiation dose, sectional anatomy, CT imaging protocols and technique, and pediatric CT imaging.

RS 520 – Advanced Applications of Computed Tomography – 45 Clock Hours/3 Semester Credit Hours

Prerequisite: None

This course is designed to introduce the student to the basic principles of physics and instrumentation as it relates to computed tomography. Course topics will include: historical perspectives of the modality, physics and physical characteristics of the computed tomography process, data acquisition, scanner design, image processing, and image quality.

RS 530 – Computed Tomography Registry Review – 45 Clock Hours/3 Semester Credit Hours

Prerequisite: None

Course reviews the computed tomography curriculum and prepare students for the ARRT® CT post-primary certification examination covering the ARRT® Exam content specifications Patient Care, Safety, Image Production, and Procedures. This course also include CT Basics ASRT modules and satisfies the ARRT® 16-credit Structured Education Requirements for CT.

RS 540 – Physical Principles of MRI – 45 Clock Hours/3 Semester Credit Hours

Prerequisite: None

This unit provides the student with a comprehensive overview of MR imaging principles. The subjects are formatted in individual outlines and can be sequenced according to the level of knowledge desired. Topics include nuclear MR signal production, tissue characteristics, pulse sequencing, imaging parameters/options and image formation.

RS 550 – Advanced Applications in MRI – 45 Clock Hours/3 Semester Credit Hours

Prerequisite: None

This course will provide the student with imaging techniques related to the CNS, neck, thorax, musculoskeletal system, and abdominopelvic regions. Students will learn specific clinical application, coils that are available and their use, considerations in the scan sequences, specific choices in the protocols (i.e.; slice thickness, phase direction, flow compensation), and positioning criteria. Anatomical structures and the plane that best demonstrates anatomy will be discussed as well as signal characteristics of normal and abnormal structures. Pharmacology as it pertains to MRI will be discussed. Students will demonstrate the practices they have learned by applying their didactic knowledge during their laboratories.

RS 560 –MRI Safety and Registry Review – 45 Clock Hours/3 Semester Credit Hours

Prerequisite: None

This course will prepare the student for and to pass the required registry board exams so that they are able to work as MRI Technologists. This course includes a review of the MRI program and the students will take a mock registry board exams and practice tests. Students will learn effective ways to study and answer question from the registry. This course provides basic knowledge of MR safety, patient preparation and monitoring of patients in the MR suite. This information enables the student to better communicate with the health care team to ensure patients' safety. Health effects and safety issues are important aspects of this diagnostic modality.

RS 570 – Principles of Mammography – 45 Clock Hours/3 Semester Credit Hours

Prerequisite: None

This course is designed to educate radiographers in the art and science of mammography. Enrollees in the course must have a California Certified Radiologic Technologist (CRT) license OR be a student in a JRCERT accredited program. The course consists of 40 hours of lecture which will assist in preparation for the California Mammography Certificate exam and the ARRT Post-Primary Certification in Mammography.

RS 580 – Advanced Applications in Mammography – 45 Clock Hours/3 Semester Credit Hours

Prerequisite: None

This course will offer students an understanding of breast ultrasound history, breast cancer, diagnosis and imaging, principles, equipment, breast anatomy and normal appearances, exam techniques, image interpretation, recording and reporting, benign and malignant disease, imaging of the augmented breast, breast disease in males, and interventional techniques. This is an overview course of breast ultrasound.

RS 590 – Mammography Registry Review – 45 Clock Hours/3 Semester Credit Hours

Prerequisite: None

This course is designed to prepare the students for the registry exam for mammography. Course topics will include: history, patient education, anatomy, physiology and pathology of the breast, benign and malignant diseases, equipment, processing and quality management, common imaging procedures, emerging technologies, interventional procedures and treatment options review and MQSA standards.

RS 610 – Radiation Safety – 45 Clock Hours/3 Semester Credit Hours

Prerequisite: None

This course provides an overview of radiation safety issues as it pertains to all aspects of radioactive materials and computed tomography. Management of radiation safety records, personnel exposure monitoring, and quality management records will be discussed. The course will review routine safety training and radiation protection practices in computed tomography, fluoroscopy, radiography, and magnetic resonance imaging in relation to the roles of a radiation safety officer.

RS 620 – PET AND PET/CT Imaging – 45 Clock Hours/3 Semester Credit Hours

Prerequisite: None

Revised by: Gurnick Academy of Medical Arts Process Department
Effective Dates: January 1, 2025, to December 31, 2025
Date of Revision: May 2, 2025

This course provides students with advanced knowledge related to positron emission tomography (PET) and hybrid imaging techniques in computed tomography (CT) and magnetic resonance imaging (MRI). This course provides an overview of PET radionuclide production, physics, instrumentation, and image fusion. Students will learn the oncologic, neurologic, infection/inflammation, and cardiac applications of PET imaging.

RS 630 – Nuclear Cardiology – 45 Clock Hours/3 Semester Credit Hours

Prerequisite: None

This course provides diagnostic medical imaging students with in-depth knowledge of nuclear cardiology principles. Review of cardiac anatomy, physiology, and pathophysiology is included. Nuclear cardiology topics include stress-testing and non-stress testing cardiac procedures including general nuclear medicine, PET/CT, and SPECT/CT.

RS 640 – Professionalism in Radiation Therapy – 45 Clock Hours/3 Semester Credit Hours

Prerequisite: None

This course explores the critical aspects of professionalism within the field of radiation therapy. Students will examine the principles of ethical decision-making, effective communication, and professional conduct essential for delivering high-quality patient care. The course emphasizes the importance of cultural competence, teamwork, and maintaining professional boundaries while navigating the complexities of a healthcare environment. Through discussions, case studies, and reflective assignments, students will develop the skills necessary to manage challenging situations, uphold patient confidentiality, and engage in continuous professional development. By the end of the course, students will be equipped with the knowledge and tools to embody professionalism throughout their careers as radiation therapists, contributing to their personal growth and the advancement of the field.

RS 650 – Advanced Modalities in Radiation Therapy – 45 Clock Hours/3 Semester Credit Hours

Prerequisite: None

This course provides an in-depth exploration of advanced technologies and techniques in radiation therapy, focusing on cutting-edge modalities such as proton therapy, stereotactic radiosurgery (SRS), stereotactic body radiotherapy (SBRT), FLASH, and brachytherapy. Students will examine the principles, clinical applications, and treatment planning considerations of these modalities, with emphasis on optimizing patient outcomes and safety. The course will also cover emerging trends in radiation oncology, including image-guided radiotherapy (IGRT) and adaptive radiotherapy, preparing students to integrate advanced technologies into clinical practice. Critical analysis of case studies and current research will be employed to enhance understanding of these complex treatment techniques.

RS 660 – Dosimetry and Treatment Planning Techniques – 45 Clock Hours/3 Semester Credit Hours

Prerequisite: None

This course provides students with principles related to dosimetry and treatment planning in radiation therapy. This course provides an in-depth review of dosimetric safety and biological principles, physics, treatment planning, quality assurance, radiation safety, and image fusion.

ACADEMIC CALENDAR 2025

HOLIDAYS FOR ALL CAMPUSES AND PROGRAMS*

January 1, 2025	New Year's Day
January 20, 2025	Dr. Martin Luther King Jr. Day
February 17, 2025	Presidents' Day
May 26, 2025	Memorial Day
June 19, 2025	Juneteenth Day
July 4, 2025	Independence Day
September 1, 2025	Labor Day
October 13, 2025	Indigenous Peoples' Day
November 11, 2025	Veterans Day
November 27, 2025 - November 28, 2025	Thanksgiving Break
December 24, 2025	Christmas Eve
December 25, 2025	Christmas Day
December 31, 2025	New Year's Eve

*Online courses are not subjected to the above Holiday schedule. Please refer to the course schedule once enrolled.

2025 START DATES PER CAMPUS AND PER PROGRAM

	San Jose	Concord	Modesto	Fresno	Sacramento	Van Nuys
ADN				Jan 6, 2025 May 5, 2025 Sept 2, 2025
